Re: Power output data question forwarded from the SRC

Type of Power Output Data to be Requested
\$ kWh per turbine per day
\$ Operating time per turbine per day (number of 10-minute intervals greater than 0)
\$ Average RPM per turbine per day with frequency distribution
\$ From Oct. 2005 forward
\$ If not available per day, at the smallest time interval available

Dear Sandra,

Several of the Altamont wind companies have reviewed this request for data and have the following questions:

1. Please explain the intended purpose and specific uses of this data.
2. For what specific analyses will this data be used?
3. How will providing this information contribute to reducing avian fatalities?

We would appreciate responses to these questions in order to be able to fully assess the potential benefits of providing the requested information. As always, we appreciate the efforts of the County and the SRC in assisting the companies in their efforts to reduce avian mortality in the Altamont.

Thank you,

M. Joan Stewart
